Independent auditors' report

To the Shareholders and Supervisory Board of Yapi Kredi Bank Azerbaijan CJSC

We have audited the accompanying consolidated financial statements of Yapi Kredi Bank Azerbaijan CJSC and its subsidiary, which comprise the consolidated statement of financial position as at 31 December 2015, and the consolidated statements of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with the International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing audit procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The audit procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management of the audited entity, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Yapi Kredi Bank Azerbaijan CJSC and its subsidiary as at 31 December 2015, and their financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards.

Ernet & Young Holdings (CIS) B.V.

1. Principal activities

Yapi Kredi Bank Azerbaijan (the "Yapi Kredi Bank") was incorporated and is domiciled in the Republic of Azerbaijan. Yapi Kredi Bank Azerbaijan is a closed joint-stock company limited by shares and was set up in accordance with Azerbaijani regulations.

The Yapi Kredi Bank's principal business activity is commercial and retail banking operations within the Republic of Azerbaijan. The Yapi Kredi Bank has operated under a full banking licence issued by the Central Bank of the Republic of Azerbaijan (the "CBAR") since 11 January 2000 under registration number 243. The Yapi Kredi Bank participates in the state deposit insurance scheme, which was introduced by the Azeri Law, "Insurance of individual deposits in the Republic of Azerbaijan" dated 29 December 2006. The State Deposit Insurance Fund guarantees full repayment of deposits of individuals in the amount up to AZN 30 subject to other conditions. The Yapi Kredi Bank's registered address is 73G Jalil Mammadguluzadeh street Baku, AZ1078, Azerbaijan.

On 31 July 2007, Yapi Kredi Bank Azerbaijan registered its wholly-owned brokerage subsidiary, Yapi Kredi Invest LLC (the "subsidiary") with the Ministry of Justice of the Republic of Azerbaijan. The Subsidiary commenced its operations in February 2008 and is involved in dealing and brokerage operations. The official address of the Subsidiary is 73G Jalil Mammadguluzadeh street Baku, AZ1078, Azerbaijan.

The consolidated financial statements include the financial statements of the Yapi Kredi Bank and its subsidiary (collectively referred to as the "Bank").

The Bank has 16 branches (2014: 14 branches), 1 customer services unit (2014: 1 unit) and 1 exchange office (2014: 1 exchange office) within the Republic of Azerbaijan. The Bank had 409 employees at 31 December 2015 (2014: 463).

As at 31 December 2015 and 2014 the following shareholders owned the outstanding shares of the Bank:

Shareholder	<u></u>
Yapı ve Kredi Bankası A.Ş.	99.8
YK Yatirim Menkul Degerler A.Ş.	0.1
YK Lease A.Ş.	0.1
Total	100.0

Yapı ve Kredi Bankası A.Ş. ("YKB"), an entity established in Turkey, is the ultimate parent of the Bank. YKB's shares have been traded on the Istanbul Stock Exchange ("ISE") since 1987. As at 31 December 2015, 18.20% of the shares of YKB are publicly traded (31 December 2014: 18.20%). The remaining 81.80% is owned by Koç Finansal Hizmetler A.Ş. ("KFS"). The ultimate shareholders of KFS are UniCredito Italiano SPA and Koç Holding, with 50% ownership each.

2. Basis of preparation

General

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by International Accounting Standards Board ("IASB").

The Azerbaijani manat is the reporting and functional currency of the Bank as the majority of the transactions are denominated, measured, or funded in Azerbaijani manat. Transactions in other currencies are treated as transactions in foreign currencies. These consolidated financial statements are presented in thousands of Azerbaijani manats ("AZN"), except per share amounts and unless otherwise indicated.

The consolidated financial statements have been prepared under the historical cost convention except as disclosed in the accounting policies below. For example, available-for-sale securities have been measured at fair value.

3. Summary of accounting policies

Changes in accounting policies

The Bank has adopted the following amended IFRS which are effective for annual periods beginning on or after 1 January 2015:

Annual improvements 2010-2012 cycle

These improvements are effective from 1 July 2014. They include:

IFRS 8 Operating Segments

The amendments are applied retrospectively and clarifies that:

- An entity must disclose the judgments made by management in applying the aggregation criteria in paragraph 12 of IFRS 8, including a brief description of operating segments that have been aggregated and the economic characteristics (e.g., sales and gross margins) used to assess whether the segments are "similar".
- The reconciliation of segment assets to total assets is only required to be disclosed if the reconciliation is reported to the chief operating decision maker, similar to the required disclosure for segment liabilities.

The Bank has not applied the aggregation criteria in IFRS 8.12. The Bank has presented the reconciliation of segment assets to total assets in previous periods and continues to disclose the same in Note 5 in these consolidated financial statements as the reconciliation is reported to the chief operating decision maker for the purpose of her decision making.

IFRS 13 Short-term Receivables and Payables - Amendments to IFRS 13

This amendment to IFRS 13 clarifies in the Basis for Conclusions that short-term receivables and payables with no stated interest rates can be measured at invoice amounts when the effect of discounting is immaterial. This is consistent with the Bank's current accounting policy, and thus this amendment does not impact the Bank's accounting policy.

IAS 16 Property, Plant and Equipment and IAS 38 Intangible Assets

The amendment is applied retrospectively and clarifies in IAS 16 and IAS 38 that the asset may be revalued by reference to observable data on either the gross or the net carrying amount. In addition, the accumulated depreciation or amortisation is the difference between the gross and carrying amounts of the asset. The Bank did not record any revaluation adjustments during the current period.

IAS 24 Related Party Disclosures

The amendment is applied retrospectively and clarifies that a management entity (an entity that provides key management personnel services) is a related party subject to the related party disclosures. In addition, an entity that uses a management entity is required to disclose the expenses incurred for management services. This amendment is not relevant for the Bank as it does not receive any management services from other entities.

Annual improvements 2011-2013 cycle

These improvements are effective from 1 July 2014 and the Bank has applied these amendments for the first time in these consolidated financial statements. They include:

IFRS 13 Fair Value Measurement

The amendment is applied prospectively and clarifies that the portfolio exception in IFRS 13 can be applied not only to financial assets and financial liabilities, but also to other contracts within the scope of IFRS 9 (or IAS 39, as applicable). The Bank does not apply the portfolio exception in IFRS 13.

Basis of consolidation

Subsidiaries, which are those entities which are controlled by the Bank, are consolidated. Control is achieved when the Bank is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Bank controls an investee if, and only if, the Bank has:

- power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
- exposure, or rights, to variable returns from its involvement with the investee;
- the ability to use its power over the investee to affect its returns.

3. Summary of accounting policies (continued)

Basis of consolidation (continued)

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Bank has less than a majority of the voting or similar rights of an investee, the Bank considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- the contractual arrangement(s) with the other vote holders of the investee;
- rights arising from other contractual arrangements;
- the Bank's voting rights and potential voting rights.

Subsidiaries are consolidated from the date on which control is transferred to the Bank and are no longer consolidated from the date that control ceases. All intra-group transactions, balances and unrealised gains on transactions between group companies are eliminated in full; unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Where necessary, accounting policies for subsidiaries have been changed to ensure consistency with the policies adopted by the Bank.

A change in the ownership interest of a subsidiary, without a change of control, is accounted for as an equity transaction. Losses are attributed to the non-controlling interests even if that results in a deficit balance.

If the Bank loses control over a subsidiary, it derecognizes the assets (including goodwill) and liabilities of the subsidiary, the carrying amount of any non-controlling interests, the cumulative translation differences, recorded in equity; recognizes the fair value of the consideration received, the fair value of any investment retained and any surplus or deficit in profit or loss and reclassifies the parent's share of components previously recognized in other comprehensive income to profit or loss.

Fair value measurement

The Bank measures financial instruments, such as available-for-sale securities and derivatives at fair value at each balance sheet date. Fair values of financial instruments measured at amortised cost are disclosed in Note 24.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- ▶ in the principal market for the asset or liability; or
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Bank. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Bank uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- ▶ Level 3 valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Bank determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

3. Summary of accounting policies (continued)

Financial assets

Initial recognition

Financial assets in the scope of IAS 39 are classified as either financial assets at fair value through profit or loss, loans and receivables or available-for-sale financial assets, as appropriate. The Bank determines the classification of its financial assets upon initial recognition, and subsequently can reclassify financial assets in certain cases as described below.

Date of recognition

All regular way purchases and sales of financial assets are recognized on the trade date i.e. the date that the Bank commits to purchase the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the market place.

Financial assets at fair value through profit or loss

Financial assets classified as held for trading are included in the category "financial assets at fair value through profit or loss". Financial assets are classified as held for trading if they are acquired for the purpose of selling in the near term. Derivatives are also classified as held for trading unless they are designated and effective hedging instruments. Gains or losses on financial assets held for trading are recognized in consolidated statement of profit or loss and other comprehensive income.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are not entered into with the intention of immediate or short-term resale and are not classified as trading securities or designated as investment securities available-for-sale. Such assets are carried at amortized cost using the effective interest method. Gains and losses are recognized in consolidated statement of profit or loss and other comprehensive income when the loans and receivables are derecognized or impaired, as well as through the amortization process.

Available-for-sale financial assets

Available-for-sale financial assets are those non-derivative financial assets that are designated as available-for-sale or are not classified in any of the three preceding categories. After initial recognition available-for sale financial assets are measured at fair value with gains or losses being recognized in other comprehensive income until the investment is derecognized or until the investment is determined to be impaired at which time the cumulative gain or loss previously reported in other comprehensive income is reclassified to the consolidated statement of profit or loss and other comprehensive income. However, interest calculated using the effective interest method is recognized in consolidated statement of profit or loss and other comprehensive income.

Reclassification of financial assets

If a non-derivative financial asset classified as held for trading is no longer held for the purpose of selling in the near term, it may be reclassified out of the fair value through profit or loss category in one of the following cases:

- ▶ a financial asset that would have met the definition of loans and receivables above may be reclassified to loans and receivables category if the Bank has the intention and ability to hold it for the foreseeable future or until maturity;
- other financial assets may be reclassified to available-for-sale or held to maturity categories only in rare circumstances.

A financial asset classified as available-for-sale that would have met the definition of loans and receivables may be reclassified to loans and receivables category of the Bank has the intention and ability to hold it for the foreseeable future or until maturity.

Financial assets are reclassified at their fair value on the date of reclassification. Any gain or loss already recognized in profit or loss is not reversed. The fair value of the financial asset on the date of reclassification becomes its new cost or amortized cost, as applicable.

Cash and cash equivalents

Cash and cash equivalents consist of cash on hand, amounts due from the Central Bank of Azerbaijan Republic (CBAR), excluding obligatory reserves, and amounts due from credit institutions that mature within ninety days of the date of origination and are free from contractual encumbrances.

3. Summary of accounting policies (continued)

Repurchase and reverse repurchase agreements and securities lending

Sale and repurchase agreements ("repos") are treated as secured financing transactions. Securities sold under sale and repurchase agreements are retained in the consolidated statement of financial position and, in case the transferee has the right by contract or custom to sell or repledge them, reclassified as securities pledged under sale and repurchase agreements. The corresponding liability is presented within amounts due to credit institutions or customers. Securities purchased under agreements to resell ("reverse repo") are recorded as amounts due from credit institutions or loans to customers as appropriate. The difference between sale and repurchase price is treated as interest and accrued over the life of repo agreements using the effective yield method.

Securities lent to counterparties are retained in the consolidated statement of financial position. Securities borrowed are not recorded in the consolidated statement of financial position, unless these are sold to third parties, in which case the purchase and sale are recorded within gains less losses from trading securities in the consolidated statement of profit or loss and other comprehensive income. The obligation to return them is recorded at fair value as a trading liability.

Borrowings

Issued financial instruments or their components are classified as liabilities, where the substance of the contractual arrangement results in the Bank having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity instruments. Such instruments include amounts due to the CBAR, amounts due to credit institutions, amounts due to customers and debt securities issued. After initial recognition, borrowings are subsequently measured at amortized cost using the effective interest method. Gains and losses are recognized in consolidated statement of profit or loss and other comprehensive income when the borrowings are derecognized as well as through the amortization process.

If the Bank purchases its own debt, it is removed from the consolidated statement of financial position and the difference between the carrying amount of the liability and the consideration paid is recognized in consolidated statement of profit or loss and other comprehensive income.

Leases

Operating - Bank as lessee

Leases of assets under which the risks and rewards of ownership are effectively retained by the lessor are classified as operating leases. Lease payments under an operating lease are recognized as expenses on a straight-line basis over the lease term and included into general and administrative expenses.

Measurement of financial instruments at initial recognition

When financial instruments are recognized initially, they are measured at fair value, adjusted, in the case of instruments not at fair value through profit or loss, for directly attributable fees and costs.

The best evidence of the fair value of a financial instrument at initial recognition is normally the transaction price. If the Bank determines that the fair value at initial recognition differs from the transaction price, then:

- if the fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e., a Level 1 input) or based on a valuation technique that uses only data from observable markets, the Bank recognizes the difference between the fair value at initial recognition and the transaction price as a gain or loss;
- in all other cases, the initial measurement of the financial instrument is adjusted to defer the difference between the fair value at initial recognition and the transaction price. After initial recognition, the Bank recognizes that deferred difference as a gain or loss only when the inputs become observable, or when the instrument is derecognized.

Offsetting of financial instruments

Financial assets and liabilities are offset and the net amount is reported in the statement of financial position when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. The right of set-off must not be contingent on a future event and must be legally enforceable in all of the following circumstances:

- the normal course of business;
- the event of default; and
- ▶ the event of insolvency or bankruptcy of the entity and all of the counterparties.

These conditions are not generally met in master netting agreements, and the related assets and liabilities are presented gross in the consolidated statement of financial position.

3. Summary of accounting policies (continued)

Impairment of financial assets

The Bank assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred "loss event") and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Amounts due from credit institutions and loans to customers

For amounts due from credit institutions and loans to customers carried at amortized cost, the Bank first assesses individually whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Bank determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risks characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognized are not included in a collective assessment of impairment.

If there is an objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the assets' carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in in profit or loss. Interest income continues to be accrued on the reduced carrying amount based on the original effective interest rate of the asset. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realized or has been transferred to the Bank. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the allowance account. If a future write-off is later recovered, the recovery is credited to the consolidated statement of profit or loss and other comprehensive income.

The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate. The calculation of the present value of the estimated future cash flows of a collateralized financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

For the purpose of a collective evaluation of impairment, financial assets are grouped on the basis of the Bank's internal credit grading system that considers credit risk characteristics such as asset type, industry, geographical location, collateral type, past-due status and other relevant factors.

Future cash flows on a group of financial assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the years on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently. Estimates of changes in future cash flows reflect, and are directionally consistent with, changes in related observable data from year to year (such as changes in unemployment rates, property prices, commodity prices, payment status, or other factors that are indicative of incurred losses in the group or their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

Available-for-sale financial investments

For available-for-sale financial investments, the Bank assesses at each reporting date whether there is objective evidence that an investment or a group of investments is impaired.

In the case of equity investments classified as available-for-sale, objective evidence would include a significant or prolonged decline in the fair value of the investment below its cost. Where there is evidence of impairment, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognized in profit or loss – is reclassified from other comprehensive income to the consolidated statement of profit or loss and other comprehensive income. Impairment losses on equity investments are not reversed through the consolidated statement of profit or loss and other comprehensive income; increases in their fair value after impairment are recognized in consolidated statement of profit or loss and other comprehensive income.

3. Summary of accounting policies (continued)

Impairment of financial assets (continued)

In the case of debt instruments classified as available-for-sale, impairment is assessed based on the same criteria as financial assets carried at amortized cost. Future interest income is based on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded in profit or loss. If, in a subsequent year, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the impairment loss is reversed through the consolidated statement of profit or loss and other comprehensive income.

Renegotiated loans

Where possible, the Bank seeks to restructure loans rather than to take possession of collateral. This may involve extending the payment arrangements and the agreement of new loan conditions. The accounting treatment of such restructuring is as follows:

- ▶ if the currency of the loan has been changed the old loan is derecognized and the new loan is recognized;
- if the loan restructuring is not caused by the financial difficulties of the borrower the Bank uses the same approach as for financial liabilities described below:
- if the loan restructuring is due to the financial difficulties of the borrower and the loan is impaired after restructuring, the Bank recognizes the difference between the present value of the new cash flows discounted using the original effective interest rate and the carrying amount before restructuring in the provision charges for the period. In case loan is not impaired after restructuring the Bank recalculates the effective interest rate.

Once the terms have been renegotiated, the loan is no longer considered past due. Management continuously reviews renegotiated loans to ensure that all criteria are met and that future payments are likely to occur. The loans continue to be subject to an individual or collective impairment assessment, calculated using the loan's original or current effective interest rate.

Derecognition of financial assets and liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized where:

- the rights to receive cash flows from the asset have expired;
- the Bank has transferred its rights to receive cash flows from the asset, or retained the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a "through" arrangement; and
- the Bank either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Bank has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Bank's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Bank could be required to repay.

Where continuing involvement takes the form of a written and/or purchased option (including a cash-settled option or similar provision) on the transferred asset, the extent of the Bank's continuing involvement is the amount of the transferred asset that the Bank may repurchase, except that in the case of a written put option (including a cash-settled option or similar provision) on an asset measured at fair value, the extent of the Bank's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

Financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statement of profit or loss and other comprehensive income.

3. Summary of accounting policies (continued)

Financial guarantees

In the ordinary course of business, the Bank gives financial guarantees, consisting of letters of credit and guarantees. Financial guarantees are initially recognized in the consolidated financial statements at fair value, in "Other liabilities", being the premium received. Subsequent to initial recognition, the Bank's liability under each guarantee is measured at the higher of the amortized premium and the best estimate of expenditure required to settle any financial obligation arising as a result of the guarantee.

Any increase in the liability relating to financial guarantees is taken to the consolidated statement of profit or loss and other comprehensive income. The premium received is recognized in the consolidated statement of profit or loss and other comprehensive income on a straight-line basis over the life of the guarantee.

Taxation

The current income tax expense is calculated in accordance with the regulations of the Republic of Azerbaijan.

Deferred tax assets and liabilities are calculated in respect of temporary differences using the liability method. Deferred income taxes are provided for all temporary differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes, except where the deferred income tax arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

A deferred tax asset is recorded only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized. Deferred tax assets and liabilities are measured at tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates that have been enacted or substantively enacted at the reporting date.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, associates and joint ventures, except where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

In addition, there are various operating taxes in Azerbaijan such as VAT, property tax, withholding tax and others which become relevant as a result of the Bank's operations. These taxes are included as a component of general and administrative expenses.

Property and equipment

Property and equipment are carried at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and any accumulated impairment. Such cost includes the cost of replacing part of equipment when that cost is incurred if the recognition criteria are met.

The carrying values of property and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

Depreciation of an asset begins when it is available for use. Depreciation is calculated on a straight-line basis over the following estimated useful lives:

	Years	
Leasehold improvements	4-15	
Furniture and fixtures	4-5	
Computers and office equipment	4	
Motor vehicles	4	

The asset's residual values, useful lives and methods are reviewed, and adjusted as appropriate, at each financial year-end.

Costs related to repairs and renewals are charged when incurred and included in other operating expenses, unless they qualify for capitalization.

3. Summary of accounting policies (continued)

Intangible assets

Intangible assets other than goodwill include computer software and licenses.

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortized over the useful economic lives of 1 to 10 years and assessed for impairment whenever there is an indication that the intangible asset may be impaired. Amortization periods and methods for intangible assets with indefinite useful lives are reviewed at least at each financial year-end.

Repossessed collateral

In certain circumstances, collateral is repossessed following the foreclosure on loans that are in default. Repossessed collateral is measured at the lower of carrying amount or net realizable value and reported within "Other assets".

Provisions

Provisions are recognized when the Bank has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of obligation can be made.

Share capital

Ordinary shares are classified as equity. External costs directly attributable to the issue of new shares, other than on a business combination, are shown as a deduction from the proceeds in equity. Any excess of the fair value of consideration received over the par value of shares issued is recognized as additional paid-in capital.

Segment reporting

The Bank's segmental reporting is based on the following operating segments: Retail banking and Corporate banking.

Contingencies

Contingent liabilities are not recognized in the consolidated statement of financial position but are disclosed unless the possibility of any outflow in settlement is remote. A contingent asset is not recognized in the consolidated statement of financial position but disclosed when an inflow of economic benefits is probable.

Recognition of income and expenses

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Bank and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized.

Interest and similar income and expense

For all financial instruments measured at amortized cost and interest bearing securities classified as trading or available-for-sale, interest income or expense is recorded at the effective interest rate, which is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or financial liability. The calculation takes into account all contractual terms of the financial instrument (for example, prepayment options) and includes any fees or incremental costs that are directly attributable to the instrument and are an integral part of the effective interest rate, but not future credit losses. The carrying amount of the financial asset or financial liability is adjusted if the Bank revises its estimates of payments or receipts. The adjusted carrying amount is calculated based on the original effective interest rate and the change in carrying amount is recorded as interest income or expense.

Once the recorded value of a financial asset or a group of similar financial assets has been reduced due to an impairment loss, interest income continues to be recognized using the original effective interest rate applied to the new carrying amount.

3. Summary of accounting policies (continued)

Recognition of income and expenses (continued)

Fee and commission income

The Bank earns fee and commission income from a diverse range of services it provides to its customers. Fee income can be divided into the following two categories:

Fee income earned from services that are provided over a certain period of time

Fees earned for the provision of services over a period of time are accrued over that period. These fees include commission income. Loan commitment fees for loans that are likely to be drawn down and other credit related fees are deferred (together with any incremental costs) and recognized as an adjustment to the effective interest rate on the loan.

Fee income from providing transaction services

Fees arising from negotiating or participating in the negotiation of a transaction for a third party are recognized on completion of the underlying transaction. Fees or components of fees that are linked to a certain performance are recognized after fulfilling the corresponding criteria.

Dividend income

Revenue is recognized when the Bank's right to receive the payment is established.

Foreign currency translation

Transactions in foreign currencies are initially recorded in the functional currency converted at the rate of exchange ruling at the date of transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the reporting date. Gains and losses resulting from the translation of foreign currency transactions are recognized in the consolidated statement of profit or loss and other comprehensive income as gains less losses from foreign currencies – translation differences. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Differences between the contractual exchange rate of a transaction in a foreign currency and the CBAR exchange rate on the date of the transaction are included in gains less losses from dealing in foreign currencies. The Bank used the following official exchange rates at 31 December 2015 and 2014 in the preparation of these consolidated financial statements:

	2015	2014
1 US dollar	AZN 1.5594	AZN 0.7844
1 EUR	AZN 1.7046	AZN 0.9522

Standards and interpretations issued but not yet effective

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Bank's consolidated financial statements are disclosed below. The Bank intends to adopt these standards, if applicable, when they become effective.

IFRS 9 Financial Instruments

In July 2014, the IASB issued the final version of IFRS 9 *Financial Instruments* which reflects all phases of the financial instruments project and replaces IAS 39 *Financial Instruments: Recognition and Measurement* and all previous versions of IFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting.

IFRS 9 is effective for annual periods beginning on or after 1 January 2018, with early application permitted. Retrospective application is required, but comparative information is not compulsory. Early application of previous versions of IFRS 9 (2009, 2010 and 2013) is permitted if the date of initial application is before 1 February 2015. The adoption of IFRS 9 will have an effect on the classification and measurement of the Bank's financial assets, but no impact on the classification and measurement of the Bank's financial liabilities. The Bank expects a significant impact on its equity due to adoption of IFRS 9 impairment requirements, but it will need to perform a more detailed analysis which considers all reasonable and supportable information, including forward-looking elements to determine the extent of the impact.

3. Summary of accounting policies (continued)

Standards and interpretations issued but not yet effective (continued)

IFRS 15 Revenue from Contracts with Customers

IFRS 15 was issued in May 2014 and establishes a new five-step model that will apply to revenue arising from contracts with customers. Revenue arising from lease contracts within the scope of IAS 17 *Leases*, insurance contracts within the scope of IFRS 4 *Insurance Contracts* and financial instruments and other contractual rights and obligations within the scope of IAS 39 *Financial Instruments: Recognition and Measurement* (or IFRS 9 *Financial Instruments*, if early adopted) is out of IFRS 15 scope and is dealt by respective standards.

Under IFRS 15 revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The principles in IFRS 15 provide a more structured approach to measuring and recognizing revenue.

The new revenue standard is applicable to all entities and will supersede all current revenue recognition requirements under IFRS. Either a full or modified retrospective application is required for annual periods beginning on or after 1 January 2018 with early adoption permitted. The Bank is currently assessing the impact of IFRS 15 and plans to adopt the new standard on the required effective date.

Amendments to IAS 16 and IAS 38 Clarification of Acceptable Methods of Depreciation and Amortization

The amendments clarify the principle in IAS 16 and IAS 38 that revenue reflects a pattern of economic benefits that are generated from operating a business (of which the asset is part) rather than the economic benefits that are consumed through use of the asset. As a result, a revenue-based method cannot be used to depreciate property, plant and equipment and may only be used in very limited circumstances to amortize intangible assets. The amendments are effective prospectively for annual periods beginning on or after 1 January 2016, with early adoption permitted. These amendments are not expected to have any impact to the Bank given that the Bank has not used a revenue-based method to depreciate its non-current assets.

Annual improvements 2010-2014 cycle

These improvements are effective on or after 1 January 2016 and are not expected to have a material impact on the Bank. They include:

IFRS 7 Financial Instruments: Disclosures - servicing contracts

IFRS 7 requires an entity to provide disclosures for any continuing involvement in a transferred asset that is derecognized in its entirety. The Board was asked whether servicing contracts constitute continuing involvement for the purposes of applying these disclosure requirements. The amendment clarifies that a servicing contract that includes a fee can constitute continuing involvement in a financial asset. An entity must assess the nature of the fee and arrangement against the guidance for continuing involvement in paragraphs IFRS 7.B30 and IFRS 7.42C in order to assess whether the disclosures are required. The amendment must be applied for annual periods beginning on or after 1 January 2016, with earlier application permitted. The amendment is to be applied such that the assessment of which servicing contracts constitute continuing involvement will need to be done retrospectively. However, the required disclosures would not need to be provided for any period beginning before the annual period in which the entity first applies the amendments.

IAS 34 Interim Financial Reporting - Disclosure of Information "Elsewhere in the Interim Financial Report"

The amendment states that the required interim disclosures must either be in the interim financial statements or incorporated by cross-reference between the interim financial statements and wherever they are included within the greater interim financial report (e.g., in the management commentary or risk report). The Board specified that the other information within the interim financial report must be available to users on the same terms as the interim financial statements and at the same time. If users do not have access to the other information in this manner, then the interim financial report is incomplete. The amendment should be applied retrospectively for annual periods beginning on or after 1 January 2016, with earlier application permitted.

IFRS 16 Leases

In January 2016, the IASB issued IFRS 16 Leases with an effective date of annual periods beginning on or after 1 January 2019. IFRS 16 results in lessees accounting for most leases within the scope of the standard in a manner similar to the way in which finance leases are currently accounted for under IAS 17 *Leases*. Lessees will recognise a "right of use" asset and a corresponding financial liability on the balance sheet. The asset will be amortised over the length of the lease and the financial liability measured at amortised cost. Lessor accounting remains substantially the same as in IAS 17. The Bank is currently assessing the impact of IFRS 16 on its financial statements.

3. Summary of accounting policies (continued)

Standards and interpretations issued but not yet effective (continued)

IAS 12 Income Taxes

In January 2016, the IASB issued amendments to IAS 12 *Income Taxes*. The amendments clarify how to account for deferred tax assets related to debt instruments measured at fair value and clarify recognition of deferred tax assets for unrealised losses, to address diversity in practice. Entities are required to apply the amendments for annual periods beginning on or after 1 January 2017. Earlier application is permitted. These amendments are not expected to have any impact on the Bank.

4. Significant accounting judgments and estimates

In the process of applying the Bank's accounting policies, management has made the following judgments, apart from those involving estimates, which have the most significant effect on the amounts recognized in the consolidated financial statements. The most significant use of judgments and estimates are as follows:

Allowance for loan impairment

The Bank regularly reviews its loans and receivables to assess impairment. The Bank uses its experienced judgment to estimate the amount of any impairment loss in cases where a borrower is in financial difficulties and there are few available sources of historical data relating to similar borrowers. Similarly, the Bank estimates changes in future cash flows based on the observable data indicating that there has been an adverse change in the payment status of borrowers in a group, or national or local economic conditions that correlate with defaults on assets in the group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the group of loans and receivables. The Bank uses its experienced judgment to adjust observable data for a group of loans or receivables to reflect current circumstances.

Determination of collateral value

Management monitors market value of collateral on a regular basis. Management uses its experienced judgment or independent opinion to adjust the fair value to reflect the current circumstances. The amount and collateral required depend on the assessment of credit risk of the counterparty.

Fair value of financial instruments

Where the fair values of financial assets and financial liabilities recorded on the consolidated statement of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques. These techniques are derived from observable market data where possible, but if this is not available, judgment is required to establish fair values. The judgments include considerations of liquidity risk, credit risk and volatility for longer-dated financial assets and liabilities. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Related party transactions

In the normal course of business the Bank enters into transactions with its related parties. IAS 39 requires initial recognition of financial instruments based on their fair values. Judgment is applied in determining if transactions are priced at market or non-market interest rates, where there is no active market for such transactions. The basis for judgment is pricing for similar types of transactions with unrelated parties and effective interest rate analysis.

Useful lives of property and equipment and intangible assets

Management determines the estimated useful lives and related depreciation and amortization charges for its property, plant and equipment and intangible assets. This estimate is based on projected period over which the Bank expects to consume economic benefits from the asset. The useful lives are reviewed at least at each reporting date. Changes in any of the above conditions or estimates may result in adjustments to future depreciation rates.

5. Segment information

For management purposes, the Bank is organized into two operating segments based on products and services as follows:

Retail banking Principally handling individual customers' deposits, and providing consumer loans, overdrafts,

credit cards facilities and funds transfer facilities.

Corporate banking Principally handling loans and other credit facilities and deposit and current accounts for corporate

and institutional customers.

Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance, as explained in the table below, is measured differently from profit or loss in the consolidated financial statements.

Transfer prices between operating segments are on an arm's length basis in a manner similar to transactions with third parties.

No revenue from transactions with a single external customer or counterparty amounted to 10% or more of the Bank's total revenue in 2015 or 2014.

The following tables present revenue, expenses and profit information regarding the Bank's operating segments.

2015	Retail banking	Corporate banking	Unallocated	Total
Revenue				
Interest income	20,571	15,799	11	36,381

Other segment information				
Capital expenditure	4,378	3,181	59	7,618

Geographic information

The Bank's revenues from third party customers for the years ended 31 December 2015 and 2014 are mainly generated in the Republic of Azerbaijan.

6. Cash and cash equivalents

Cash and cash equivalents comprise:

	2015	2014
Cash on hand	28,161	20,549
Current accounts with the CBAR	21,397	11,302
Current accounts with other credit institutions	72,090	22,561
Cash and cash equivalents	121,648	54,412

Current accounts with other credit institutions consist of non-interest bearing correspondent account balances with resident and non-resident banks in the amount of AZN 283 (2014: AZN 649) and AZN 71,807 (2014: AZN 21,912), respectively.

7. Amounts due from credit institutions

Amounts due from credit institutions comprise:

	2015	2014
Time deposits	50,026	_
Blocked current account with the CBAR	31,203	8
Obligatory reserve with the CBAR	1,160	4,505
Amounts due from credit institutions	82,389	4,513

As of 31 December 2015, time deposits due from credit institutions include two deposits (2014: nil) placed at non-resident bank denominated in USD, maturing on 14 January 2016 and 29 January 2016 respectively, with the annual effective interest rates of 1.10%-1.35%.(2014: nil)

As at 31 December 2015, blocked current account with the CBAR of AZN 31,188 thousand (2014: nil) represented funds blocked against borrowings from the CBAR (Note 14).

Credit institutions are required to maintain a non-interest earning cash deposit (obligatory reserve) with the CBAR, the amount of which depends on the level of funds attracted by the credit institution. The Bank's ability to withdraw such deposit is significantly restricted by the statutory legislation.

8. Loans to customers

Loans to customers comprise:

	2015	2014
Corporate lending	156,424	145,962
Consumer lending	73,350	88,886
Small business lending	26,606	23,521
Residential mortgages	12,862	11,133
Gross loans to customers	269,242	269,502
Less: allowance for impairment	(17,490)	(7,171)
Loans to customers	251,752	262,331

As at 31 December 2015, out of the total amount of loans 49.3% (2014: 37.25%) are denominated in foreign currencies. The increase in the share of the foreign currency denominated loan portfolio as compared to the previous year is mostly due to the devaluation of AZN against major currencies by approximately 34% and 48%, on 21 February 2015 and on 21 December 2015, respectively

8. Loans to customers (continued)

Allowance for impairment of loans to customers

A reconciliation of the allowance for impairment of loans to customers by class is as follows:

_	Corporate lending	Small business lending	Consumer lending	Residential mortgages	Total
At 1 January 2015	3,013	659	3,326	173	7,171
Charge for the year	4,946	1,127	4,243	255	10,571
Amounts written off	(252)				(252)
At 31 December 2015	7,707	1,786	7,569	428	17,490
Individual impairment	7,013	1,544	1,091	342	9,990
Collective impairment	694	242	6,478	86	7,500
	7,707	1,786	7,569	428	17,490
Gross amount of loans, individually determined to be impaired, before deducting any individually assessed impairment allowance	21,927	5,311	2,378	625	30,241
_	Corporate lending	Small business lending	Consumer lending	Residential mortgages	Total
At 1 January 2014	1,504	377	1,315	_	3,196
Charge for the year	1,509	282	2,011	173	3,975
At 31 December 2014	3,013	659	3,326	173	7,171
Individual impairment	1,285	333	234	124	1,976
Collective impairment	1,728	326	3,092	49	5,195
·	3,013	659	3,326	173	7,171
Gross amount of loans, individually determined to be impaired, before deducting any individually assessed impairment allowance	2,968	853	441	186	4,448

Individually impaired loans

As at 31 December 2015, loans in the amount of AZN 30,241 thousand (2014: AZN 9,193) were assessed individually. An individual impairment allowance of AZN 9,423 thousand (2014: AZN 1,976) were recognized for such loans. Interest income accrued on loans, for which individual impairment allowances have been recognized, for the year ended 31 December 2015, comprised AZN 1,725 (2014: AZN 303).

In accordance with the CBAR requirements, loans may only be written off with the approval of the Supervisory Board and, in certain cases, with the respective decision of the Court.

Collateral and other credit enhancements

The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. Guidelines are implemented regarding the acceptability of types of collateral and valuation parameters.

The main types of collateral obtained are as follows:

- ▶ for corporate lending charges over real estate and trade receivables, third party guarantees;
- for consumer lending cash, charges over credited consumer appliances and mortgages over residential properties;
- for auto lending cash and liens over vehicles.

Management monitors the market value of collateral, requests additional collateral in accordance with the underlying agreement, and monitors the market value of collateral obtained during its review of the adequacy of the allowance for loan impairment.

8. Loans to customers (continued)

Concentration of loans to customers

As of 31 December 2015, the Bank had a concentration of loans represented by AZN 72,332 or 27% of gross loan portfolio (2014: AZN 59,559 or 22%) due from the ten (2014: ten) largest third party borrowers.

Loans have been extended to the following types of customers (amounts are presented prior to allowance):

	2015	2014
Private companies	156,424	145,962
Individuals	112,818	123,540
Gross loans to customers	269,242	269,502

Loans are made within Azerbaijan in the following industry sectors (amounts are presented prior to allowance):

	2015	2014
Individuals	112,818	123,540
Trading enterprises	96,234	90,879
Real estate construction	30,597	29,408
Manufacturing	29,593	25,675
Gross loans to customers	269,242	269,502

9. Investment securities available-for-sale

Investment securities available-for-sale comprise:

	2015	2014
Bonds issued by the Mortgage Fund of the Republic of Azerbaijan Corporate unquoted shares (5% ownership interest at Baku Stock	-	8,693
Exchange)	60	60
Available-for-sale securities	60	8,753

Nominal interest rates and maturities of debt securities are as follows:

	2015		2014	
	Annual interest rate	Maturity	Annual interest rate	Maturity
Bonds issued by the Mortgage Fund of the Republic of Azerbaijan	-	-	3.00%	December 2023

Intangible assets	(103)	27	(76)	65	(11)
Other liabilities	274	295	569	93	662
Other assets	(6)	6	_	15	15
Deferred tax liability	(674)	118	(556)	(634)	(1,190)

13. Other assets and liabilities

Other assets comprise:

·	2015	2014
Amounts in the course of settlement	894	432
Other financial assets	894	432
Prepayments	2,760	1,388
Repossessed collateral	190	-
Other	125	75
Other non-financial assets	3,075	1,463
Other assets	3,969	1,895

As at 31 December 2015, prepayments of AZN 2,760 (2014: AZN 1,388) primarily comprise of advance payments for purchase of property and equipment, advertisement, insurance and rent services.

Other liabilities comprise:

	2015	2014
Settlements on plastic cards	410	982
Payables on purchase of property and equipment	90	486
Other	154	389
Other financial liabilities	654	1,857
Accrued employee costs	1,660	1,318
Deferred income	764	950
Provisions	244	494
Payables to social funds	206	89
Other	137	150
Other non-financial liabilities	3,011	3,001
Other liabilities	3,665	4,858

Accrued employee costs include bonuses for employees based on the financial performance of the Bank of AZN 866 (2014: AZN 665) and an accrual for unused vacations of AZN 794 (2014: AZN 653).

As at 31 December 2015 and 2014, deferred income represents deferred revenue which was primarily comprised of fee received for issuance of plastic cards, guarantees and letter of credits.

14. Amounts due to the CBAR

As at 31 December 2015, the Bank had loans from the CBAR amounting to AZN 20,000 maturing until 26 May 2016 (2014: nil). The Bank pledged USD 20,000 (AZN 31,188) against these loans (Note 7).

15. Amounts due to credit institutions

Amounts due to credit institutions comprise:

	2015	2014
Loans from banks	103,584	64,475
Time deposits	13,001	· -
Demand deposits	4,406	4,311
Amounts due to Azerbaijan Mortgage Fund	2,211	727
Amounts due to credit institutions	123,202	69,513

The Bank pays interest on demand deposits at the rates ranging from 3.00% p.a. to 3.50% p.a. for USD and from 0.25% p.a. to 2.50% p.a. for euro (2014: from 3.00% p.a. to 3.50% p.a. for USD, from 0.25% p.a. to 2.50% p.a. for euro).

As at 31 December 2015, the Bank had loans financed by the Azerbaijan Mortgage Fund amounting to AZN 2,211 (2014: AZN 727) maturing in 2045 (2014: 2045), with the annual interest rates of 1-4% p.a. (2014: 1-4% p.a.)

During 2015, the Bank attracted deposits from two resident commercial banks comprising AZN 13,001 (2014: nil), maturing on 16 March 2016, with the annual interest rates of 10.25%-13% p.a. (2014: nil)

16. Amounts due to customers

The amounts due to customers include the following:

v	2015	2014
Current accounts	138,426 74.434	89,290 80,093
Time deposits Amounts due to customers	212,860	169,383
Held as security against guarantees (Note 19)	2,899	56

As at 31 December 2015, amounts due to customers of AZN 74,768 or 35% (2014: AZN 54,432 or 32%) of total amounts due to customers were due to ten (2014: ten) largest customers.

The average annual interest rate on term deposits of individual customers outstanding at 31 December 2015 comprised 7.57% (2014: 7.09%), while the average annual interest rate on term deposits of legal entities outstanding at 31 December 2015 was 10.58% (2014: 7.53%).

Amounts due to customers include accounts with the following types of customers:

	2015	2014
Private enterprises	143,048	112,113
Individuals	69,462	56,496
Public organizations	350	774
Amounts due to customers	212,860	169,383
An analysis of customer accounts by economic sector follows:	2015	2014
Trade	88,907	60,945
Individuals	69,462	56,496
Insurance	29,895	39,164
Real estate constructions	20,982	6,752
Transport and communication	3,264	5,252
State and public organizations	350	774
Amounts due to customers	212,860	169,383

17. Debt securities issued

As at 31 December 2015 the balance of debt securities issued was AZN 48,759 (2014: AZN 38,376).

On 20 June 2014, the Bank issued domestic bonds having a nominal value of AZN 15,000 maturing on 20 June 2016.

In 2015 the Bank repurchased debt securities in amount of AZN 13,000. As at 31 December 2015, carrying amount of the placement comprised AZN 2,006 (2014: AZN 15,044).

On 18 December 2014, the Bank issued on private placement basis bonds having nominal value of USD 30,000 maturing on 19 December 2016. As at 31 December 2015, carrying amount of the placement comprised AZN 46,753 (2014: AZN 23,332).

18. Equity

As at 31 December 2015 and 2014 number of ordinary shares amounted to 2,340,535,194. All ordinary shares have a nominal value of 0.02 per share denominated in Azerbaijani manats and rank equally. Each share carries one vote.

The share capital of the Bank was contributed by the shareholders in Azerbaijani manats and they are entitled to dividends and any capital distribution in Azerbaijani manats.

19. Commitments and contingencies

Operating environment

Azerbaijan continues economic reforms and development of its legal, tax and regulatory frameworks as required by the market economy. The future stability of the Azerbaijan economy is largely dependent upon these reforms and developments and the effectiveness of economic, financial and monetary measures undertaken by the government. As a result of significant drop in crude oil prices, Azerbaijani manat devalued against the US dollar from AZN 0.7862 to AZN 1.0500 for 1 USD on 21 February 2015 and further to AZN 1.5500 for 1 USD on 21 December 2015. Following the second devaluation, the Central Bank of the Republic of Azerbaijan announced floating exchange rate.

These events resulted in worsening of liquidity in the banking system and much tighter credit conditions. There continues to be uncertainty regarding economic growth, access to capital and cost of capital which could adversely affect the Bank's future results and financial position and business prospects in a manner not currently determinable. Such adverse impacts could include deterioration of the quality of the loan portfolio, with increases in non-performing loans and decreases in loan collateral values.

Azerbaijani government announced plans to accelerate reforms and support to banking system in response to current economic challenges.

Legal

In the ordinary course of business, the Bank is subject to legal actions and complaints. Management believes that the ultimate liability, if any, arising from such actions or complaints will not have a material adverse effect on the financial condition or the results of future operations of the Bank.

Taxation

Azerbaijani tax, currency and customs legislation is subject to varying interpretations, and changes, which can occur frequently. Management's interpretation of such legislation as applied to the transactions and activity of the Bank may be challenged by the relevant authorities. Recent events within Azerbaijan suggest that the tax authorities are taking a more assertive position in its interpretation of the legislation and assessments and, as a result, it is possible that transactions and activities that have not been challenged in the past may be challenged. As such, significant additional taxes, penalties and interest may be assessed. Fiscal periods remain open to review by the authorities in respect of taxes for three calendar years preceding the year of review.

Management believes that as at 31 December 2015 its interpretation of the relevant legislation is appropriate and that the Bank's tax and social contribution position will be sustained.

Insurance

The Bank has not currently obtained insurance coverage related to liabilities arising from errors or omissions. Liability insurance is generally not available in Azerbaijan at present.

19. Commitments and contingencies (continued)

Compliance with CBAR ratios

CBAR requires banks to maintain certain prudential ratios computed based on statutory financial statements. As at 31 December 2015, the Bank was in compliance with these ratios except for maximum credit exposure per a single borrower or a group of related borrowers ratio that should not exceed 7 percent of the bank's Tier 1 capital when the market value of the security of credit exposures is less than 100 percent of such credit exposures, or the market value of real estate collateral of loans is below 150% of the loan value. As at 31 December 2015, the Bank's ratio was 22.5% (31 December 2014: 6.9%).

The aforementioned breach of the CBAR ratio is related to specific non-government funded project. Throughout the year the Bank submitted information to CBAR regarding this breach on a monthly basis and no sanctions were ever applied to the Bank. Management believes that the Bank will not face any sanctions against the Bank in the future.

The Bank provides guarantees and letters of credit to customers with primary purpose of ensuring that funds are available to a customer as required. Guarantees and standby letters of credit represent irrevocable assurances that the Bank will make payments in the event that a customer cannot meet its obligations to third parties. Documentary and commercial letters of credit, which are written undertakings by the Bank on behalf of a customer authorizing a third party to draw drafts on the Bank up to a stipulated amount under specific terms and conditions, are collateralized by the underlying shipments of goods, to which they relate, or cash deposits and, therefore, carry less risk than a direct borrowing.

Commitments and contingencies

As at 31 December, the Bank's commitments and contingencies comprised the following:

	2015	2014
Credit related commitments		
Undrawn loan commitments	76,077	78,881
Guarantees issued	47,496	24,419
Letters of credit	1,938	1,439
	125,511	104,739
Operating lease commitments		
Not later than 1 year	3,118	2,053
Later than 1 year but not later than 5 years	11,707	8,407
Later than 5 years	1,770	2,439
·	16,595	12,899
Commitments and contingencies (before deducting collateral)	142,106	117,638
Less - cash held as security against guarantees (Note 16)	(2,899)	(56)
Commitments and contingencies	139,207	117,582

Most of the outstanding guarantee letters as at 31 December 2015 and 2014 represent guarantees issued to clients for the latters' performance on delivering goods and services, and tender guarantees issued to clients as a pledge of their intent to participate in a bidding tender, announced by various institutions.

20. Net fee and commission income

Net fee and commission income comprises:

23. Risk management

Introduction

Risk is inherent in the Bank's activities and managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is critical to the Bank's sustainability and profitability and each individual within the Bank is accountable for the risk exposures relating to his or her responsibilities. The Bank is exposed to credit risk, liquidity risk, market risk and operating risks.

The independent risk control process does not include business risks such as changes in the environment, technology and industry. They are monitored through the Bank's strategic planning process.

Risk management structure

The Board of Directors is ultimately responsible for identifying and controlling risks; however, there are separate independent bodies responsible for managing and monitoring risks.

Board of Directors

The Board of Directors is responsible for the overall risk management approach and for approving the risk strategies and principles.

Management Board

The Management Board has the responsibility to monitor the overall risk process within the Bank.

Risk Committee

The Risk Committee has the overall responsibility for the development of the risk strategy and implementing principles, frameworks, policies and limits. It is responsible for the fundamental risk issues and manages and monitors relevant risk decisions.

Risk Management Unit

The Risk Management Unit is responsible for implementing and maintaining risk related procedures to ensure an independent control process.

Risk Controlling Unit

The Risk Controlling Unit is responsible for monitoring compliance with risk principles, policies and limits, across the Bank. Each business group has a decentralized unit which is responsible for the independent control of risks, including monitoring the risk of exposures against limits and the assessment of risks of new products and structured transactions. This unit also ensures the complete capture of the risks in risk measurement and reporting systems.

Bank Treasury

Bank Treasury is responsible for managing the Bank's assets and liabilities and the overall financial structure. It is also primarily responsible for the funding and liquidity risks of the Bank.

Internal Audit

Risk management processes throughout the Bank are audited annually by the internal audit function that examines both the adequacy of the procedures and the Bank's compliance with the procedures. Internal Audit discusses the results of all assessments with management, and reports its findings and recommendations to the Audit Committee.

Risk measurement and reporting systems

The Bank's risks are measured using a method which reflects both the expected loss likely to arise in normal circumstances and unexpected losses, which are an estimate of the ultimate actual loss based on statistical models. The models make use of probabilities derived from historical experience, adjusted to reflect the economic environment. The Bank also runs worst case scenarios that would arise in the event that extreme events which are unlikely to occur do, in fact, occur.

Monitoring and controlling risks is primarily performed based on limits established by the Bank. These limits reflect the business strategy and market environment of the Bank as well as the level of risk that the Bank is willing to accept, with additional emphasis on selected industries. In addition the Bank monitors and measures the overall risk bearing capacity in relation to the aggregate risk exposure across all risks types and activities.

23. Risk management (continued)

Introduction (continued)

Information compiled from all the businesses is examined and processed in order to analyze, control and identify early risks. On a regular basis detailed reporting of industry and customer risks takes place.

Excessive risk concentration

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Bank's performance to developments affecting a particular industry.

In order to avoid excessive concentrations of risks, the Bank's policies and procedures include specific guidelines to focus on maintaining a diversified portfolio. Identified concentrations of credit risks are controlled and managed accordingly.

Credit risk

Credit risk is the risk that the Bank will incur a loss because its customers, clients or counterparties failed to discharge their contractual obligations. The Bank manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for geographical and industry concentrations, and by monitoring exposures in relation to such limits.

The Bank has established a credit quality review process to provide early identification of possible changes in the creditworthiness of counterparties, including regular collateral revisions. Counterparty limits are established by the use of a credit risk classification system, which assigns each counterparty a risk rating. Risk ratings are subject to regular revision. The credit quality review process allows the Bank to assess the potential loss as a result of the risks to which it is exposed, to take corrective action and to provide adequate capital against credit risk incurred.

The Bank makes available to its customers guarantees which may require that the Bank make payments on their behalf. Such payments are collected from customers based on the terms of the letter of credit. They expose the Bank to similar risks to loans and these are mitigated by the same control processes and policies.

The maximum exposure to credit risk for the components of the consolidated statement of financial position before the effect of mitigation through the use of master netting and collateral agreements and after deducting any allowance for impairment is best represented by their carrying amounts.

Where financial instruments are recorded at fair value, the carrying amounts represent the current credit risk exposure but not the maximum risk exposure that could arise in the future as a result of changes in values.

Credit-related commitments risks

The Bank offers guarantees to its customers which may require that the Bank make payments on their behalf. Such payments are collected from customers based on the terms of the letter of credit. They expose the Bank to risks similar to loans and these are mitigated by the same control processes and policies.

The maximum exposure to credit risk for the components of the statement of financial position, before the effect of mitigation through the use of master netting and collateral agreements, is best represented by their carrying amounts.

Credit quality per class of financial assets

The credit quality of financial assets is managed by the Bank internal credit ratings. The table below shows the credit quality by class of asset for loan-related lines in the consolidated statement of financial position, based on the Bank's credit rating system.

As at 31 December 2015 cash and cash equivalents as well as amounts due from credit institutions held at the CBAR, OECD, CIS and other foreign countries investment grade banks are classified as high grade. Cash and cash equivalents held in other banks is included in standard grade.

(Thousands of Azerbaijani Manats)

23. **Risk management (continued)**

Credit risk (continued)

Total

In the table below financial assets of high grade are those having a minimal level of credit risk, normally with a credit rating on or close to sovereign level or very well collateralized. Loans to customers and other financial assets with good financial position and good debt service are included in the standard grade. Sub-standard grade comprises loans below standard grade that had changes in the terms and conditions of loan agreements, but not individually impaired.

It is the Bank's policy to maintain accurate and consistent risk ratings across the credit portfolio. This facilitates focused management of the applicable risks and the comparison of credit exposures across all lines of business and products. The rating system is supported by a variety of financial analytics, combined with processed market information to provide the main inputs for the measurement of counterparty risk. All internal risk ratings are tailored to the various categories and are derived in accordance with the Bank's rating policy. The attributable risk ratings are assessed and updated regularly.

See Note 8 for more detailed information with respect to the allowance for impairment of loans to customers.

Impairment assessment

The main considerations for the loan impairment assessment are based on the information provided by the roll-rate model, which measures the movement of the past due amounts balances in various time brackets. The Bank addresses impairment assessment in two areas: individually assessed allowances and collectively assessed allowances.

Individually assessed allowances

The Bank determines the allowances appropriate for each individually significant loan on an individual basis. Items considered when determining allowance amounts include the sustainability of the counterparty's business plan, its ability to improve performance once a financial difficulty has arisen, projected receipts and the expected dividend payout should bankruptcy ensue, the availability of other financial support and the realizable value of collateral, and the timing of the expected cash flows. The impairment losses are evaluated at each reporting date, unless unforeseen circumstances require more careful attention.

Collectively assessed allowances

Allowances are assessed collectively for losses on loans to customers that are not individually significant (including credit cards, residential mortgages and unsecured consumer lending) and for individually significant loans where there is not yet objective evidence of individual impairment. Allowances are evaluated on each reporting date with each portfolio receiving a separate review. The collective assessment takes account of impairment that is likely to be present in the portfolio even though there is no yet objective evidence of the impairment in an individual assessment. Impairment losses are estimated by taking into consideration the roll-rate model assessment. The impairment allowance is then reviewed by credit management to ensure alignment with the Bank's overall policy.

Financial guarantees and letters of credit are assessed and provision made in a similar manner as for loans.

23. Risk management (continued)

Liquidity risk and funding management

Liquidity risk is the risk that the Bank will be unable to meet its payment obligations when they fall due under normal and stress circumstances. To limit this risk, management has developed a sophisticated system for comprehensive assessment of expected cash flows. The methodology of the liquidity management tools and reports is approved by the Supervisory Board of the Bank, prepared by the Assets and Liabilities Management department and reviewed on the monthly basis by Asset Liabilities Committee.

The Bank maintains a portfolio of highly marketable and diverse assets that can be easily liquidated in the event of an unforeseen interruption of cash flow. Additionally, the Bank maintains obligatory reserve with the CBAR and utilizes a highly effective cash management system across all its branches, ATMs and balances of the correspondent accounts.

The liquidity position is assessed and managed by the Bank primarily on a standalone basis, based on minimum liquidity ratio of 30% established by the CBAR. As at 31 December, these ratios were as follows:

_	2015	2014
Instant Liquidity Ratio	81.11%	61.92%

Analysis of financial liabilities by remaining contractual maturities

The tables below summarize the maturity profile of the Bank's financial liabilities at 31 December based on contractual undiscounted repayment obligations. Repayments which are subject to notice are treated as if notice were to be given immediately. However, the Bank expects that many customers will not request repayment on the earliest date the Bank could be required to pay and the table does not reflect the expected cash flows indicated by the Bank's deposit retention history.

As at 31 December 2015	Less than 3 months	3 to 12 months	1 to 5 years	Over 5 years	Total
Financial liabilities Amounts due to the CBAR	189	20,069	_	_	20,258
Amounts due to credit institutions Amounts due to customers	19,209 167,044	104,482 43,023	514 800	2,372 3,662	126,577 214,529

Total undiscounted financial liabilities	187,096	219,566	1,314	6,034	414,010

23. Risk management (continued)

Liquidity risk and funding management (continued)

As at 31 December 2014	Less than 3 months	3 to 12 months	1 to 5 years	Over 5 years	Total
Financial liabilities					
Amounts due to credit					
institutions	9,188	25,698	37,110	843	72,839
Amounts due to customers	119,179	47,273	6,300	_	172,752
Debt securities issued	· -	2,766	40,621	_	43,387
Other financial liabilities	1,857	_	_	_	1,857
Total undiscounted financial liabilities	130,224	75,737	84,031	843	290,835

The table below shows the contractual expiry by maturity of the Bank's financial commitments and contingencies. Each undrawn loan commitment is included in the time band containing the earliest date it can be drawn down. For issued financial guarantee contracts, the maximum amount of the guarantee is allocated to the earliest period in which the guarantee could be called.

	Less than 3 months	3 to 12 months	1 to 5 years	Over 5 years	Total
2015	90,699	26,805	8,006	-	125,510
2014	86,818	12,924	4,997	_	104,739

The Bank expects that not all of the contingent liabilities or commitments will be drawn before expiry of the commitments.

The Bank's capability to repay its liabilities relies on its ability to realize an equivalent amount of assets within the same period of time.

The Bank does not receive any significant funds from any one organization or private individual. The maturity analysis does not exhibit any significant negative gaps in any given period.

Included in due to customers are term deposits of individuals. In accordance with the Azerbaijan legislation, the Bank is obliged to repay such deposits upon demand of a depositor. Refer to Note 15.

Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates and foreign exchanges. The Bank does not have any significant equity, corporate fixed income or derivatives holdings.

Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments.

As at 31 December 2015 and 2014, the Bank did not have any instruments with floating interest rates.

Currency risk

Currency risk is defined as the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Bank is exposed to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows.

23. Risk management (continued)

Market risk (continued)

The tables below indicate the currencies to which the Bank had significant exposure at 31 December on its non-trading monetary assets and liabilities and its forecast cash flows. The analysis calculates the effect of a reasonably possible movement of the currency rate against AZN, with all other variables held constant on the statement of profit or loss and other comprehensive income (due to the fair value of currency sensitive non-trading monetary assets and liabilities). The effect on equity does not differ from the effect on the statement of profit or loss and other comprehensive income. A negative amount in the table reflects a potential net reduction in statement of profit or loss or equity and other comprehensive income, while a positive amount reflects a net potential increase.

Currency	Increase in currency rate in % 2015	Effect on profit before tax 2015	Increase in currency rate in % 2014	Effect on profit before tax 2014
USD	60	4,487	35.00	3,043
EUR	60	5	35.00	13

Currency	Decrease in	Effect on profit	Decrease in	Effect on profit
	currency rate in %	before tax	currency rate in %	before tax
	2015	2015	2014	2014
USD	(15)	(1,122)	(8.74)	(760)
EUR	(15)	(1)	(10.70)	(4)

Operational risk

Operational risk is the risk of loss arising from systems failure, human error, fraud or external events. When controls fail to perform, operational risks can cause damage to reputation, have legal or regulatory implications, or lead to financial loss. The Bank cannot expect to eliminate all operational risks, but a control framework and monitoring and responding to potential risks could be effective tools to manage the risks. Controls should include effective segregation of duties, access, authorization and reconciliation procedures, staff education and assessment processes, including the use of internal audit.

24. Fair values of financial instruments

Fair value hierarchy

24. Fair values of financial instruments (continued)

Fair value hierarchy (continued)

Fair value of financial assets and liabilities not carried at fair value

Set out below is a comparison by class of the carrying amounts and fair values of the Bank's financial instruments that are not carried at fair value in the consolidated statement of financial position. The table does not include the fair values of non-financial assets and non-financial liabilities.

2015	Carrying value	Fair value	Unrecognized gain/(loss)
Financial assets			
Cash and cash equivalents	121,648	121,648	-
Amounts due from credit institutions	82,389	82,389	-
Loans to customers	269,242	265,435	(3,807)
Other financial assets	894	894	
Financial liabilities			
Amounts due to the CBAR	20,014	20,014	_
Amounts due to credit institutions	123,202	123,202	_
Amounts due to customers	212,860	212,860	-
Debt securities issued	48,759	48,759	-
Other financial liabilities	654	654	_

2014	Carrying value	Fair value	Unrecognized gain/(loss)	
Financial assets				
Cash and cash equivalents	54,412	54,412	-	
Amounts due from credit institutions	4,513	4,513	-	
Loans to customers	262,331	264,233	1,902	
Other financial assets	432	432	· -	
Financial liabilities				
Amounts due to the CBAR	_	_	-	
Amounts due to credit institutions	69,513	69,513	-	
Amounts due to customers	169,383	169,383	-	
Debt securities issued	38,376	38,376	-	
Other financial liabilities	1,857	1,857	-	

Assets for which fair value approximates carrying value

For financial assets and financial liabilities that are liquid or having a short term maturity (less than three months) it is assumed that the carrying amounts approximate to their fair value. This assumption is also applied to demand deposits and savings accounts without a specific maturity.

Financial assets and financial liabilities carried at amortized cost

Fair value of the quoted notes is based on price quotations at the reporting date. The fair value of unquoted instruments, loans to customers, customer deposits, amounts due from credit institutions and amounts due to credit institutions and other financial assets and liabilities is estimated by discounting future cash flows using rates currently available for debt on similar terms, credit risk and remaining maturities

25. Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to when they are expected to be recovered or settled. See Note 24 "Risk management" for the Bank's contractual undiscounted repayment obligations.

		2015			2014

institutions	121,060	2,142	123,202	33,505	36,008	69,513
Amounts due to customers	208,432	4,428	212,860	163,567	5,816	169,383
Debt securities issued	48,759	_	48,759	101	38,275	38,376
Current income tax liabilities	_	_	-	1,317	_	1,317
Deferred income tax liabilities	_	1,190	1,190	_	556	556
Other liabilities	3,665	_	3,665	4,858	-	4,858
Total	401,930	7,760	409,690	203,348	80,655	284,003
Net	(10,332)	78,289	67,957	33,503	34,416	67,919

Negative gap will not affect the Bank's liquidity position considering that amounts due to credit institutions within one year include borrowings from entities under common controls. Therefore, management expects to the Bank will be able to prolong these borrowings.

26. Related party disclosures

In accordance with IAS 24 *Related Party Disclosures*, parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

Related parties may enter into transactions which unrelated parties might not, and transactions between related parties may not be effected on the same terms, conditions and amounts as transactions between unrelated parties.

YKB and KFS directly and indirectly control and have significant influence over a significant number of entities. The Bank enters into banking transactions with these entities including but not limited to lending, deposit taking, cash settlement and foreign exchange transactions.

26. Related party disclosures (continued)

The outstanding balances of related party transactions are as follows:

Salaries and short term benefits Other accrued employee costs	1,184 74	1,049 32
Total key management personnel compensation	1,258	1,081

27. Capital adequacy

The objectives of management when managing the Bank's capital are (i) to comply with the capital requirements set by CBAR, (ii) to safeguard the Bank's ability to continue as a going concern and (iii) to maintain strong credit ratings and healthy capital ratios in order to support its business and to maximize shareholders' value. Compliance with capital adequacy ratios set by the CBAR is monitored monthly with reports outlining their calculation reviewed and signed by the Bank's Chief Executive Officer and Chief Accountant. The other objectives of capital management are evaluated annually.

The Bank manages its capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of its activities. In order to maintain or adjust the capital structure, the Bank may adjust the amount of dividend payment to shareholders or return capital to shareholders. No changes were made in the objectives, policies and processes from the previous years.

The CBAR requires each bank or banking group to: (a) hold the minimum level of total capital of AZN 50,000 (2014: AZN 50,000); (b) maintain a ratio of total regulatory capital to the risk-weighted assets (the "total capital ratio") at or above the prescribed minimum of 10% (2014: 12%) and (c) maintain a ratio of tier 1 capital to the risk-weighted assets (the "Tier 1 capital ratio") at or above the prescribed minimum of 5% (2014: 6%).

Management believes that the Bank was in compliance with the statutory capital adequacy ratio throughout 2015 and 2014.

As at 31 December 2015, the Bank's capital adequacy ratio based on the CBAR requirements was as follows:

	2015	2014
Tier 1 capital Tier 2 capital Less: deductions from capital	61,252 4,209 (5,817)	66,025 5,720 (6,683)
Total regulatory capital	59,644	65,062
Risk-weighted assets	387,621	383,648
Tier 1 capital adequacy ratio Total capital adequacy ratio	14.30% 15.38%	15.47% 16.96%
